# M3GAN

**Gerard Johnston • 2022 • USA • 102 minutes**

She's more than a toy—she's family. M3GAN will be a marvel of A.I., a life-like doll intended to be a child's best friend and a parent's greatest ally. Designed by toy-company roboticist, Gemma (Allison Williams), M3GAN learns as she becomes playmate and protector for the child to which she is bonded. As Gemma is pressured to deliver a finished version of M3GAN, she suddenly becomes the caretaker of her newly orphaned niece, Cady (Violet McGraw). Unprepared, Gemma pairs the M3GAN prototype with Cady in an attempt to resolve both problems—a decision that will have unimaginable consequences.

The **Institute of Cyber Security for Society (iCSS)** is a University-wide institute that promotes interdisciplinary research and education in cyber security and enhances the cyber security skills of students and the wider community. More about iCSS's activities can be found here: [cyber.kent.ac.uk](https://cyber.kent.ac.uk)

The **Lupino Film Club** hosts film screenings and discussions at the University of Kent, and is organised by the Film, Media, and Culture Research Group. Follow us: [instagram.com/lupinofilmclub](https://www.instagram.com/lupinofilmclub)
