

KMCS3

Kent & Medway Cyber Security Student Society

**A COMMUNITY WITH
REAL IMPACT. REAL SKILLS.
LASTING CONNECTIONS.**

KMCS3 is the University of Kent's cyber security community, bringing together students, staff, alumni and industry professionals who share a passion for technology, security and innovation

OUR ACHIEVEMENTS

National Hackathon
Two KMCS3 teams represented the University of Kent at the UWS National Hackathon, achieving 2nd and 3rd place against some of the best university cyber security teams in the UK.

Working with Local Schools

We regularly organise Capture the Flag (CTF) competitions and cyber security workshops for local schools, helping inspire the next generation of cyber security professionals through engaging, hands-on challenges.

CTF Events

Throughout the academic year, we host our own in-house Capture the Flag (CTF) competitions, giving members the opportunity to develop practical skills, work as a team and tackle realistic cyber security challenges in a friendly environment.

“ONCE YOU'RE PART OF KMCS3, YOU'RE ALWAYS PART OF THE COMMUNITY.”

Cyber Security Development Projects

Our members collaborate on open-source, community-driven cyber security projects, developing tools that solve real-world problems while contributing back to the wider cyber security community.

100+ Members

KMCS3 has grown into a thriving community of over 100 members, bringing together students from a wide range of courses and year groups who share a passion for cyber security, technology and innovation.

Networking Opportunities

Members benefit from regular networking opportunities with industry professionals, alumni and fellow students through guest talks, conferences, careers events and social activities, helping build valuable professional connections.

DEVELOPMENT

ISC2 Certified in Cybersecurity (CC)

We support members in achieving the ISC2 Certified in Cybersecurity (CC) certification through study groups, learning resources and peer support, helping them take an important first step into the cyber security profession.

Training & Workshops

From technical workshops and hands-on labs to career development sessions and guest speakers, we provide continuous opportunities for members to develop new skills, gain industry knowledge and prepare for future careers.
